

Obsidian Corrosion Resistant Coating

Extends the life of your brake discs

New Product!

You count on Cleveland's quality wheels and brakes to land safely - every time. Now, even in extreme environments where the elements cause faster corrosion, you can feel safer with Cleveland's Obsidian brake discs. Cleveland Wheel & Brake Systems' Obsidian brake discs offer corrosion resistance that will extend the life of your brake discs, keeping your brakes healthy and your plane in service instead of in the shop.

- Extended wear life over standard discs.
- Corrosion resistant coating extends the life of your brake discs.
- Laser etched part number for easy reference and identification.
- TSO approved/OEM equipment.

Alternate to 164-04000 / 164-14000 and compatible with 40-113 wheel assemblies.

Part Number	Description
564-04000	Obsidian Brake Disc
